Summary

Cybersecurity Specialist and Penetration Tester with hands-on experience in web application, API, network, Active Directory, cloud, and AI security testing. Identified 30+ vulnerabilities across global platforms, including critical RCE and Account Takeover bugs in AT&T and NASA, plus CVEs in Gitea and Grafana. Creator of UniCrack, an open-source JWT security testing framework; currently pursuing OSCP.

Education

Ain Shams University

B.Sc. Computer Science & Statistics

Cairo, Egypt

2027

Experience

HackerOne – [mon3m](#)

Bug Hunter

Remote

02/2025 – Present

- Discovered 30+ vulnerabilities ranging from Low to Critical severity across diverse web targets.
- Reported [CVE-2026-68957](#), [CVE-2026-66849](#), [CVE-2026-66853](#), [CVE-2026-68964](#), and [CVE-2026-67577](#) in Gitea, plus [CVE-2026-13719](#) in Grafana.
- Hall of Fame: Grafana, Gitea, Acronis, HYPR, AT&T, British Airways, Honda, METRO AG, NASA, The Hut Group.

National Telecommunication Institute

Penetration Testing Trainee

Cairo, Egypt

08/2026 – 09/2026

- Completed hands-on training in web application pentesting, recon, and vulnerability assessment.

Duckurity

Penetration Tester Trainee

Cairo, Egypt

08/2026 – Present

- Practicing web, network, cloud, and AI pentesting through guided labs and real-world scenarios.
- Collaborated in team-based, authorized penetration testing of participating companies.
- Contributed to the development of open-source cybersecurity labs and challenges.

Leadership & Activities

Ain Shams University

Cybersecurity Course Instructor

Cairo, Egypt

08/2026 – 09/2026

- Delivered practical cybersecurity and penetration testing sessions to university students.
- Guided students through web security fundamentals and hands-on security exercises.

GitHub – [Unicrack](#)

Open-Source Tools Creator

Cairo, Egypt

06/2025 – Present

- Developed and maintained an open-source JWT security testing framework.
- Contributed tools and techniques to support security testing and research.

Duckurity – [Openlabs](#)

Open-Source Contributor

Cairo, Egypt

09/2026 – 09/2026

- Contributed to the development of three hands-on web security labs: [DuckMarket](#), [DuckFleet](#), and [DuckDesk](#).
- Designed and implemented realistic security scenarios covering GraphQL security, gRPC-Web, JWT authentication, and remote code execution.
- Created practical environments for security researchers to develop web penetration testing and vulnerability discovery skills.

Skills & Interests

Technical: OWASP Top 10, SQLi, XSS, SSRF, IDOR, RCE, OAuth Flaws, Subdomain Takeover, JWT Attacks.

Language: Arabic (Native), English (B2)

Laboratory: Burp Suite, Nmap, Wireshark, Metasploit, Linux, Docker, Python, and web application security testing.

Interests: Learning, Tools Development, AI.
